TEMPERANCE

In time unity will make the spaces complete.
By means of unity each one will understand himself.
By means of knowledge one will purify himself from the
multiplicity into unity, devouring matter with-in himself
like fire and darkness by light, death by life.

ALCHEMY OF SAGITTARIUS

IDEOLOGY THE POWER OF "I BELIEVE"

Sagittarius is the Archer, Chiron, half-man half-horse, a celebrated and wise satyr, who taught many of the heroes of old. He was knowledgeable in medicine, music, archery, hunting, philosophy and prophecy, known as a great teacher and healer. Sagittarius is also known as Krotos, the offspring of the god Pan. Krotos was said to have invented the bow and arrow and the rhythmic beats of the drum. He was more of a celebrated hunter and musician, enjoying all life had to offer, occupying most of his time with the Mousai. Sagittarius is also known as the teapot.

Mythos - In one legend, Chiron placed the constellation of Sagittarius in the sky for his pupils to direct and guide them on their quest for the Golden Fleece. What is fascinating about the Archer is its arrow points to our galaxy's centre in the Milky Way. And here is a great mystery that surrounds the Archer, for he is also known as Seven (the primal forces of light and sound), hinting to the great rainbow serpent that winds up the world tree (the Milkyway) — leading the way to the centre of our galaxy. Here one can cross over the celestial river to the underworld to slay the dragon and collect a sacred red gem of great power. To obtain such a gem gives one the ability to become a great healer and medicine worker with gifts of prophecy and miraculous wonders.

KEY SEARCH PHRASE "Sagittarius in the <number> house"

NOVEMBER 22ND - DECEMBER 20TH

Sagittarius seeks enlightenment through adventure, travel and philosophy. Theirs is a thirst to expand and learn (superseding everything), venturing out to find the answers they are looking for, even travelling halfway around the world. The fiery nature is always optimistic and becomes very excitable with many new ideas and projects on the go. Ultimately they want to climb to the highest peak leading to a life that will test their limits receiving greater understanding and wisdom. Sagittarius learns through experience; thankfully, they are highly adaptable and have great faith that everything will work-out. They can make excellent entrepreneurs and are very open-minded, willing to discuss serious spiritual matters and entertain philosophical ideas.

Sagittarius is mutable energy (often distracted by the next adventure) - yet they are sincere and fair-minded individuals, inspiring and encouraging others to follow their dreams and experience the adventure of life. Sociable, extroverted, energetic and active, they represent the explorer, traveller, philosopher and teacher. When living in duality, they can be restless and do things before thinking, leading irresponsibly and escapism.

TEMPERING WITH HOT AND COLD
Take a hot and cold shower in the morning four or more times before the next class. Work on tempering the body and the emotions as you temper and shock your system! Become resilient and strong! Clear out the impurities and open your field of awareness.

When subjecting the body to cold external temperatures, the flow of circulation is directed inward toward the organs. As the outside temperature gets hot, the flow of circulation is pulled outward toward the skin. Alternating hot and cold makes the circulation move in and out like an accordion. This effectively unblocks stuck energy, increasing the rate of detoxification and moving nutrients more readily to various parts of the body.

The body is mostly electric and can be described as a battery of sorts. Alternating between hot and cold, i.e.) positive and negative charges, creates just the right amount of friction to recharge the battery, giving one more energy, vitality and flow or "voltage" running through the system. This act decreases inflammation and speeds up cell regeneration, including calming the nervous system, sharping our minds, intuition and information circuits to and in the brain.

WORKING THE PATH

MORNING PRACTICE

Face the SOUTH direction with the TEMPERANCE card and your LEPIDOLITE stone. Place a drop of JUPITER OIL in your hands and smell the scent then recite the opening call;

I call upon the Great Spirit of All. May your grace descend upon me and awaken me to the power with-in; to your divine purpose and glory. May I find knowledge and understanding. In return I reach out into the world to transform this Earth into your majesty... ***I now call upon the power of TEMPERANCE through the power of SAGITTARIUS to balance and synthesize my mind, body and soul into unification. May I find joy in my practice of patience and the tempering of ice and fire in my life. I carry with me the power of LEPIDOLITE to facilitate this transmutation.*** *May my heart be open and true. May the will of your Great Spirit always be, I commit myself to the great work, so be it (amen).*

Now with your stone in hand jump in a warm shower then play the Hot & Cold Dance! Pay attention to what is flowing through your mind as you test your inner will. Do you find joy and laughter or do you find anger and resistance? Do you hold your breath blocking the energy or do you breath through it allowing the energy to flow? When you get out of the shower speak the affirmation below…

I integrate and blend the diverse elements of my life to create balance, unity and harmony in everything I do. My life is filled with joy and good health. I am Temperance, skillful in the way I live.

Bow to the power of the SOUTH honouring the power of FIRE and the power of the TEMPERANCE card. Record any insights, synchronicities or dreams in your journal. *On your off days simply sit in the morning and work the Breath of Fire!

THE GODDESS IRIS

The promise of the rainbow — the Goddess Iris travels with the speed of light with her golden wings carried on the solar and cosmic winds of the celestial rainbow. The heavenly rainbow is the path of the rainbow snake that winds its way up the World Tree delivering her messages in "dream time." This same rainbow snake is the river Styx and the great rainbow bridge of Bifrost (Norse mythology), connecting Earth with the Divine realm of creation. It is the shimmering path of the Milky Way. To return to where we came from, we must travel back up the tree by rebuilding our rainbow bodies, that we may be transformed into beings of light with celestial flight.
