## THE HIGH PRIESTESS

*I am first thought, the thought that is in light.*

*I am movement that is in all, she, in whom the realm of all, takes its stand, firstborn among those who came into being, she who exists before all.*

*I descend into the underworld and shone down on the darkness. I poured water. I am hidden in the radiant waters. I gradually dawn on all by my thought, I am weighed down with the voice. Through me knowledge comes. I am ineffable and unknowable. I am perception and knowledge, uttering a voice by means of thought. I am the real voice. I cry out in everyone, and they recognize it, since a seed lives in them. I am the Father's thought, and through me came the voice: the knowledge of everlasting things. I am as thought for all. I am joined to unknowable and intangible thought. I revealed myself in all who know me, for I joined everyone in hidden thought and exalted voice, and in a voice from the invisible thought.*

*But now I have come down and reached chaos. I was there with my own. I am hidden in them, empowering them, and giving them shape. From the first day until I grant enormous power to those who are mine, I will reveal myself to those who have heard my mysteries, the children of light.*

# THE COSMIC MOTHER

## THE WOMB OF CREATION : PATH 13 (XIII)

The spirit of the divine Mother guards the secrets to a mystical Life! As you gaze inward towards the heart, She lifts the veil of the great mystery to amazing wonders. You cross the valley of darkness, the void, the abyss (DAATH). You are THE HIGH PRIESTESS, using the power of the WATER to initiate yourself into the wisdom traditions. By following the Path of the Moon, you balance the forces of your animal nature with your spiritual nature; this is the first mystery, the mysteries of the transiting soul. Listen to your intuition, know your inner-self, remember who you are, and bring balance to your emotions' intelligence. As you cross the abyss, to the place of true love, She is the Holy Spirit, and together You are the *uniting intelligence*.

*All knowledge and understanding, are with-in my reach when  
I look and feel into my heart. I am THE PRIESTESS, unerring in my intuition!*

# ☾ ALCHEMY OF THE MOON ☾

## THE FIRST INITIATION

The Moon is (our very own interstellar satellite) broadcasting the 'symphony of the stars' while governing our emotional energy and the ebb and flow of life on our planet. She represents all that is feminine and guards the secret mysteries of the soul while orchestrating the tides of consciousness. If the Earth is the Mother and the Sky is the Father, the Moon is their daughter Isis (in Egypt), or also known as Persephone (in Greek) – the High Priestess of the underworld, governess over life and death (in other words, the high priestess of this world). Just as we pass through her gateways (of the Moon) to incarnate in material form, we must pass back through her by following the Path of the Moon to awaken and remember who we are and discover the gnosis of the heart. She is the Double-Faced woman both, Mother and Harlot, Friend and Foe, Emotional and Apathetic, the Silent Knower, sitting between the Pillars of Equilibrium (duality), encouraging and prompting us to confront our animal nature and transform it – to be born again!

**Emotions, sensitivity, mood swings, fertility, femininity, memory, intuition, instinct, duality or balance, psychic abilities, undercurrents, knowledge, wisdom, truth and honesty or secrets and lies, imagination, dreams, germination. Harvest, Goddess energy; The Divine Sophia.**

## PERSONAL RESEARCH

The Moon is all about the sowing and harvesting of seeds; she knows when to plant, weed and harvest the whole of creation. She also knows how to balance the energy flowing through you and when you become balanced with-in, and with-out, you can walk the middle path allowing for clearer and faster manifestations straight through the Middle Pillar. The Moon spends just under 2.5 days in each sign transiting the zodiacs over 29.5 days. On average, it circles the Earth 13 times a year.

# MAGICIANS TOOLS

## LAPIS LINGUIS - SILVER - MOON CYCLES - MOON OIL

**Lapis Linguis** is two stones in one, **azurite** and **malachite**, working to balance the heart's powers with the third eye. **Azurite** is the stone of the heavens! Vibrating a blue indigo-ray (the third eye's exact frequency) it stimulates the intellect, awakening and developing psychic and intuitive abilities. It is said, for the inhabitants of Atlantis, Azurite was the most potent psychic stone shrouded in mystery, and its secrets are known only to the highest priests and priestesses; as such, it assists in recovering ancient knowledge and works as a visionary tool, and dream activator.

**Malachite** is a stone of protection and transformation, vibrating a beautiful green ray (the power of the heart), and works at deep levels as a mirror to the subconscious by reflecting into the conscious mind what needs clearing. It is a highly protective stone helping one refuse temptation while opening up a psychic radar to dangers. Together, these stones cleanse the subconscious from emotionally charged thoughts to reveal the truth behind illusions – thereby restoring balance and opening the connection to the Divine Feminine's sacred powers.

Silver (Ag) is the highest conductor and reflective metal readily available. In connection with the moon, her metaphysical properties embody the qualities of a mirror, which can reflect or even deflect energy (like the Feng-Shui Bagua mirror). It works well for opening doorways (or a gateway) where energy and information can flow back and forth between the physical and ethereal realms. As the supplement, Colloidal Silver, which is ionically bioactive (when sufficiently concentrated), kills bacteria on contact and can be orally ingested. The atomic number for silver is 47 ( $4+7=11$ ); again, we see the number eleven (the pillars of duality) representing the High Priestess herself. She is the connector between the earth and moon (or physical and metaphysical), and for centuries, silver has represented her powers!
